

Xinyu Chen

Postdoc, MIT (now)

Advisor: Prof. Jinhua Zhao

PhD, University of Montreal ('23)
Civil Engineering (Transportation)

Interests

- Advanced computing for engineering
- Urban system & human mobility
- Data-driven traffic flow modeling
- Climate system monitoring
- Machine learning & data science
- Optimization & math programming

Collaboration w/ CEE, EECS, Stat, Math

Interdisciplinary Research

Computational Engineering in CEE

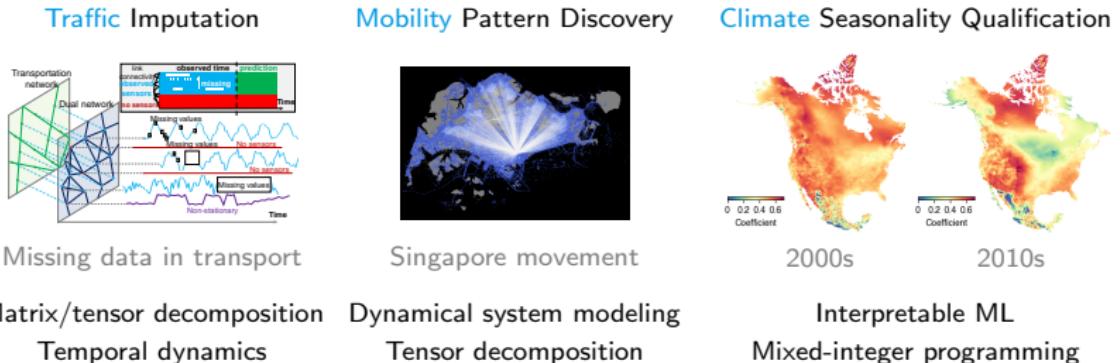

PhD (ML for Transportation)

- **Traffic imputation** w/ tensor decomposition
Chen et al.'19; Chen et al.'21 in *Transportation Research Part C* (cited 300+)
Chen et al.'22 in *IEEE Transactions Intelligent Transportation Systems* (cited 100+)
Chen et al.'24 in *IEEE Transactions on Knowledge and Data Engineering (TKDE)*
 - **Mobility prediction** w/ nonconvex optimization
Chen & Sun'22 in *IEEE Transactions on Pattern Analysis and Machine Intelligence (TPAMI)* (cited 250+)
Chen et al.'24 in *INFORMS Journal on Computing (IJOC)*
 - **Dynamic climate pattern discovery**
Chen et al.'24 in *TKDE*
- Postdoc** (ML + Optimization for Spatiotemporal Data)
- **Tensor decomposition for ML**
Chen et al.'24, major revision in *TPAMI*
 - **Causal inference from climate systems**
Chen et al.'24, 2nd-round review in *TKDE*
 - **Mobility periodicity quantification**
Ready for submission to *IJOC*

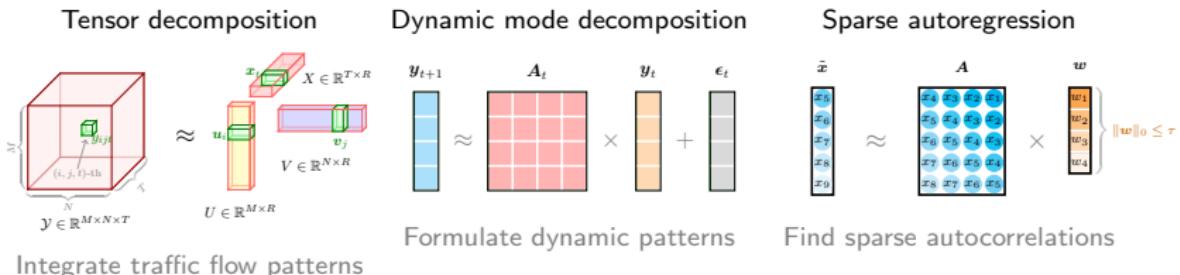

Research Contributions

- Formulating challenging engineering problems (w/ practical contributions)

- Advancing ML development (w/ methodological contributions)

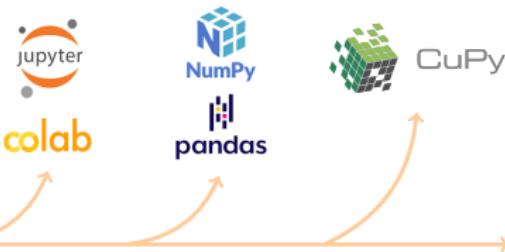

Reproducible Research for Engineering

- The last mile of AI for computational engineering

Human mobility & smart cities
Data-driven transport analytics
Spatiotemporal data modeling
Interpretable ML for causal inference
Tensor decomposition for ML

...

Directions & Topics

Reproducible Research

- Advancing ML development with open-source research

transdim
(1,200+ GitHub stars)

ML for Transport Data Imputation

<https://github.com/xinychen/transdim>

A screenshot of the MIT Tensor4ML website. The header includes the MIT logo and the text 'Tensor4ML'. Below the header, there is a section titled 'Tensor Decomposition for Machine Learning' by Xinyi Chen, Sheng Dongyu, Jiebo Zhou (2022). The page describes the development of tensor decomposition models and algorithms, along with applications in tasks like tensor decomposition, and as tensor decomposition techniques enable a new range of scientific areas and applications.

Building Research Impact at Vanderbilt University

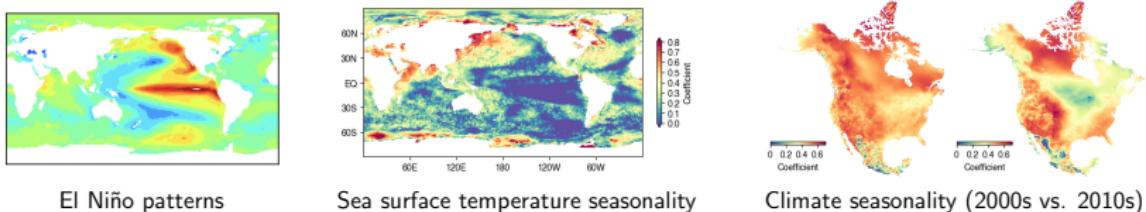

- Contributing to CEE, College of Connected Computing & Data Science Institute

(Source: [arXiv:2311.10888](https://arxiv.org/abs/2311.10888))

Vehicle trajectory

- Contributing to Vanderbilt Center for Sustainability, Energy and Climate

El Niño patterns

Sea surface temperature seasonality

Climate seasonality (2000s vs. 2010s)

- Supervising students: Undergraduate Summer Research Program; Immersion VU; Experience Vanderbilt; Serving for PhD committee
- Research group: Developing ML and optimization in transportation & mobility analytics; Developing innovative AI tools for computational engineering.

Teaching & Grant

- **Teaching Interests & Plan at Vanderbilt University**
 - Formats: Tutorial, data example, LaTeX graphic, Python code, GitHub repository, and course website

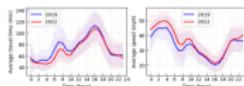

Figure 6. Average travel time and speed from area 32 (i.e., Downtown) to area 76 (i.e., Monroeville) in both 2019 and 2023

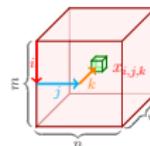

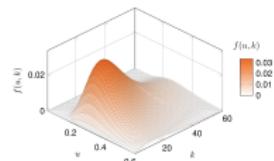

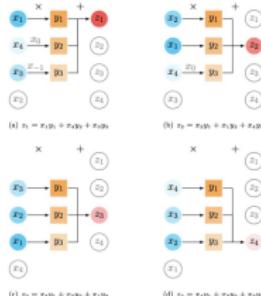

Figure 2. Illustration of the circular convolution between $\mathbf{x} = (x_1, x_2, x_3, x_4)^\top$ and $\mathbf{y} = (y_1, y_2, y_3)^\top$. (a) Computing z_1 involves $x_0 = x_4$ and $x_{-1} = x_3$. (b) Computing z_2 involves $x_0 = x_4$. The figure inspired by Prince (2023).

Data-Driven Transportation Analytics

Computing Fundamentals in CEE

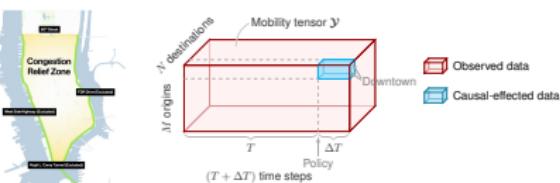

Spatiotemporal Modeling in CEE

- **Grant & Funding**

Transit-Centric Smart Mobility System with ML (DOE)

(PI: Jinhua Zhao, Role: Senior Researcher)

Causal inference for congestion pricing (NSF, submitted)

(PI: Jinhua Zhao; Co-PI: Ankur Moitra. Role: Senior Researcher)
